HCHS/SOL GOLD3 Enrollment and Tracking Form
GOL - QxQ

9/18/2024

QxQ Instructions

Q0a. Enter the date the participant consented to or refused the GOLD study.

Q0b. Enter the Staff ID of the person who consented the participant for GOLD.

Q0c. This field automatically populates in CDART based on the field center.

Q0d. Enter the Kit ID of the specimen distribution kit. If an additional kit is issued to the participant (for example, the participant lost the original kit and requests a new one from the field center), update this field with the most recent Kit ID and include the original Kit ID in the note log.

Q1. Enter the participant consent status, either 1=Refused to participate in GOLD or 3=Consents to participate, enrolled at a contact other than the V3 in-person visit. All GOLD3 enrollments will be after V3 closure.

Q2. Enter the date the specimen kit was distributed to the participant. In most cases, this will be the same date as GOL0a (date participant consented). If the participant was enrolled remotely, the dates may be different. If an additional kit is issued to the participant, update this field with the distribution date for the second kit.

Q3. When the participant returns the specimen kit, enter the date of return here. If the participant does not return the kit, leave blank.

Q4-6. These fields will be automatically populated in CDART. However, Q4 (gender) and Q5 (age) can be updated if needed.
