Qualitative Interview Screener

- Q1. This question is included in the SGM study to allow for the possibility of future qualitative interviews. We do not currently have funding for conducting in-depth qualitative interviews. However, we aim to apply for additional supplemental funds to conduct these interviews either in-person, via telephone, or via a web-conference platform. Thus, we are asking each SGM SOL study participant to indicate their willingness to participate in a qualitative interview. If funding becomes available, participants indicating yes may be contacted and will separately consent to a qualitative interview at that time. This is not a consent to conduct a qualitative interview.
